Thanks to the Sensaway mobile application on Android & IOS platforms, you can monitor the instantaneous values of your sensors in your critical environments from your smart phones.

## Main Features

- Thanks to the hierarchical tree structure, you can see the alarm status of all your locations.
- By clicking on the devices you can see all their sensors.
- You can see the alarm threshold values of the sensors.
- You can analyze the historical minimum, average and maximum values of the sensors.
- You can monitor all your locations and the devices in the locations through the application.
- You can receive mobile notifications in alarm situations.
